Enhance Knowledge with NS0-592 Sample Questions:

Question: 1

You want to add aggregate-level read caching to your storage. Which NetApp technology would you implement to accomplish this goal?

- a) Flash Cache
- b) FlexGroup
- c) FlexCache
- d) Flash Pool

Answer: d

Question: 2

A new cluster running ONTAP 9.5 has just been installed and you want to create a FlexGroup volume. Which action will accomplish this task?

- a) Use the volume create command.
- b) Use the volume size command.
- c) Use the Deploy utility to provision the FlexGroup volume.
- d) Use the storage pool create command.

Answer: a

Question: 3

You need to verify the currently active reference configuration file (RCF) version on a CN1610 cluster network switch. Which command will show you this information?

- a) script list
- b) show version
- c) show running-config
- d) show bootvar

Answer: c

Question: 4

You are running a fabric-attached MetroCluster configuration with ONTAP 9.3 software. There is a maintenance window for the upcoming weekend. Plexes in your mirrored aggregates between your two data centers have not been synchronizing for two days.

When the resynchronizations begin, they are not as quick as expected, and the process takes more than a day.

You have been modifying the number of concurrent I/O streams using the storage raid-options modify raid.resync.num_concurrent_ios_per_rg command, but the resynchronization speed stays slow.

You have four separate ISLs between your data centers using Brocade 6510 switches. Hardware problems are not an issue.

Which two actions should you take to prevent this problem in the future?

(Choose two.)

- a) Update to at least ONTAP 9.4 software.
- b) Restart the resynchronizations after modifying storage raid-options modify raid.resync.num_concurrent_ios_per_rg command.
- c) Avoid changes on your aggregates during the maintenance window.
- d) Take the corresponding plexes offline before maintenance to avoid a base-level synchronization.

Answer: a, b

Question: 5

Your current FAS2554 has 24 internal drives and a DS4243 external drive shelf. After you connect a new DS212C shelf to the SAS stack, the new DS212C shelf is not being recognized.

In this scenario, what is a supported method to enable the DS212C to work with the FAS2554?

- a) Before you attach the DS212C shelf, replace the IOM12 modules in the DS212C with IOM6 modules.
- b) Shut down the FAS2554 and replace the IOM3 modules in the DS4243 shelf with IOM12 modules.
- c) Nondisruptively connect the ACP cabling to the new DS212C shelf.
- d) Create a SAS stack on the FAS2554 for the DS212C shelf.

Answer: b

Question: 6

An administrator wants to keep an automatic daily up-to-date copy of a volume at a disaster recovery location. What should the administrator do to achieve this goal?

- a) Perform a volume relocation to the remote location.
- b) Configure a SnapMirror relationship to the remote location.
- c) Configure a SyncMirror relationship to the remote location.
- d) Perform an NDMP dump to the remote location.

Answer: b

Question: 7

Which two statements are true about a data volume?

(Choose two.)

- a) A data volume can be accessed by a LIF on any node.
- b) A data volume can be moved to any aggregate with space for it in the cluster.
- c) A data volume can be accessed by a user connected to any SVM.
- d) An SVM root or root load sharing mirror volume must be present on every node.

Answer: a, b

Question: 8

A customer reports that a node is unhealthy. The cluster show command indicates that the node's eligibility is false.

The cluster ring show command shows all the affected node's units as offline. After a reboot of the node, all of the errors still exist. The cluster is otherwise healthy.

What would you recommend to the customer to solve the issue with the node?

- a) Restart the secd process.
- b) Resync the node's configuration from the cluster.
- c) Execute the `sudo spmctl -e -h mgwd` command.
- d) Stop the spmctl process.

Answer: b

Question: 9

- a) You have a 2-node ONTAP Select HA deployment. In this scenario, which application manages the quorum, if one node fails?
- a) ONTAP Mediator
 - b) ONTAP Deploy VM
 - c) vCenter Server
 - d) Tiebreaker

Answer: b**Question: 10**

A customer reports that Vscan traffic is higher than CIFS traffic. The configuration separates the Vscan and CIFS traffic by using interface groups, each of which uses a LIF in its own subnet.

Which statement describes what is happening?

- a) The Vscan server is requesting a larger average block size than the CIFS clients.
- b) The Vscan server is not behaving as expected, and investigation with the vendor is required.
- c) This behavior is expected and depends upon Vscan server configuration.
- d) This behavior is abnormal and requires a perfstat along with a network trace for further analysis.

Answer: c

What Study Guide Works Best in Acing the NetApp NS0-592 NCSE ONTAP Specialist Certification?

The NS0-592 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the NCSE ONTAP Specialist exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on

all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the NetApp NS0-592 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a [PDF format](#) or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and Utilize the NetApp NS0-592 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, NS0-592 practice tests always stand out to be the better choice than dumps PDF.
