Get an Overview of the JN0-1362 Certification:

Who should take the **JN0-1362 exam**? This is the first question that comes to a candidate's mind when preparing for the JNCDS Service Provider certification. The JN0-1362 certification is suitable for candidates who are keen to earn knowledge on the Design and grab their Juniper Networks Certified Specialist Service Provider Design. When it is about starting the preparation, most candidates get confused regarding the study materials and study approach. But JN0-1362 study guide PDF is here to solve the problem. JN0-1362 PDF combines some effective sample questions and offers valuable tips to pass the exam with ease.

Why Should You Earn the Juniper JN0-1362 Certification?

There are several reasons why one should grab the JN0-1362 certification.

- The JNCDS Service Provider certification proves to be one of the most recognized certifications.
- The certification badge proves the knowledge of the candidate regarding subject matters and makes his resume presentable to potential candidates.
- Thus earning the **Juniper Networks Certified Specialist Service Provider Design** is a powerful qualification for a prosperous career.

What Is the Juniper JN0-1362 JNCDS Service Provider Certification Exam Structure?

Exam Name	Service Provider Design, Specialist
Exam Number	JN0-1362 JNCDS-SP
Exam Price	$300 USD
Duration	90 minutes
Number of Questions	65
Passing Score	Variable (60-70% Approx.)
Recommended Training	**Juniper Networks Design-Service Provider (JND-SP)**
Exam Registration	**PEARSON VUE**
Sample Questions	**Juniper JN0-1362 Sample Questions**

Practice Exam	**Juniper Networks Certified Specialist Service Provider Design Practice Test**

Enhance Knowledge with JN0-1362 Sample Questions:

Question: 1

Since deploying VPLS, you notice an unusually high level of traffic In your nine topology. On further inspection, you determine that broadcast traffic is causing the problem. The traffic is legitimate.

Nevertheless, you are asked to look into options that allow the network to scale. In this scenario, what would you do to solve the problem?

a) Add a broadcast policer and an unknown unicast policer to each VPLS.
b) Move from LDP-signaled VPLS to BGP-signaled VPLS.
c) Mark broadcast traffic with a high drop priority.
d) Deploy P2MP LSPs.

Answer: d

Question: 2

In your class-of-services design, you are using a multified classifier on your WAN edge devices to ensure that traffic is properly classified entering your network.

You are asked to ensure that all packets traversing your core will be handled in the same manner without using firewall filters.

Given this scenario, which statement is correct?

a) You should use forwarding classes to property mark all DiffServ values because traffic is entering your core devices.
b) You should use rewrite rules to properly mark all DiffServ values because traffic is entering your core devices from your edge
c) You should use a scheduler on all core devices to property classify incoming traffic to ensure it is handled the same.
d) You should use a behavior aggregate (BA) classifier on all core devices to ensure incoming traffic is handled the same.

Answer: d

Question: 3

What are two considerations for all WAN designs that use best industry practices?

(Choose two)

- a) to provide ease of deployment
- b) to provide scalability
- c) to provide a dynamic routing protocol internally in the LAN
- d) to provide VXLAN and EVPN solutions

Answer: a, b

Question: 4

The operations team reports that the network is now so large that it has become a challenge to manually create and maintain RSVP LSPs.

You want to provide the team with the capability to create LSPs using a graphical interface. Which system should you use in this scenario?

- a) CSO
- b) Junos Space
- c) OpenFlow
- d) Paragon Pathfinder

Answer: b

Question: 5

A customer reports a network outage at a branch office after users have reported intermittent Internet connectivity Upon further investigation, you determine that there is significant packet loss and that the majority of traffic on the WAN consists of DNS responses from many different sources.

In this scenario, which design consideration would reduce further occurrences with minimal chance of affecting valid traffic?

- a) Implement CGNAT.
- b) Create a firewall filter to drop all traffic based on the source addresses of the attack.
- c) Configure BGP flowspec.
- d) Create a firewall filter to drop all traffic to the affected destination address of the attack.

Answer: a

Question: 6

Which Juniper Networks platform automates the orchestration of compute, storage, and networking resources to create and manipulate OpenStack clouds?

- a) RingMaster
- b) WANDL
- c) Contrail
- d) NorthStar

Answer: c

Question: 7

MPLS services are being delivered from provider edge (PE) routers Each PE is connected to multiple customer edge (CE) routers. What should you use on the PE to isolate customer routes?

- a) VPN routing and forwarding tables
- b) port access control lists
- c) access control lists
- d) external BGP

Answer: a

Question: 8

A customer wants to use the Internet to connect to a large number of remote sites. They want a solution that is easy to use and one that provides secure connectivity.

Which technology will meet these requirements?

- a) Auto Discovery VPN (ADVPN)
- b) Link Layer Discovery Protocol (LLDP)
- c) equal-cost multipath (ECMP)
- d) generic routing encapsulation (GRE)

Answer: d

Question: 9

According to Juniper Networks, which two statements describe OoB network design best practices?

(Choose two.)

a) Ensure that the management network uses a unique IP network.
b) Ensure that the management network is accessible through the production network.
c) Ensure that only console ports are used to manage devices.
d) Ensure that all users are authenticated using individual accounts and credentials.

Answer: a, c

Question: 10

You are asked to create a point-to-multipoint DCI that does not overwhelm the data plane with MAC learning traffic. Which protocol would you use in this situation?

a) pseudowire
b) PPTP
c) VPLS
d) EVPN

Answer: c

What Study Guide Works Best in Acing the Juniper JN0-1362 JNCDS Service Provider Certification?

The JN0-1362 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the JNCDS Service Provider exam, getting in full touch of the **syllabus** is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on

all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the Juniper JN0-1362 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a **PDF format** or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and Utilize the Juniper JN0-1362 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, JN0-1362 practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven JN0-1362 Practice Test for Success!!!

Do you want to pass the JN0-1362 exam on your first attempt? Stop worrying; we, NWExam.com are here to provide you the best experience during your Service Provider Design, Specialist preparation. Try out our free mock tests to get a glimpse of our quality study materials, and build your confidence with the premium **JN0-1362 practice tests**. Our expert-designed questions help you to improve performance and pass the exam on your first attempt.
