## Enhance Knowledge with PL-500 Sample Questions:

### Question: 1

You are trying to record the process that a hospitality facility uses to check in patients. You need to identify bottlenecks and variations in the process. What should you use?

- a) AI Builder
- b) Process Advisor
- c) Flow checker
- d) Solution checker

**Answer: d**

### Question: 2

You are creating automation solutions for a company. You create a cloud flow that includes a Scope action. What is the purpose of the Scope action?

- a) Run a group of actions based on conditional input.
- b) Run a group of actions based on input from a switch statement.
- c) Group actions together and ensure that all actions succeed or fail as a group.
- d) Terminate a flow run.

**Answer: c**

**Question: 3**

You are developing automation solutions that process sensitive employee data for a company. You plan to implement the sensitive variables feature in Power Automate for desktop.

What are three characteristics of the sensitive variables feature?

Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- a) You can reference and manipulate variables that are marked as sensitive from within desktop flows.
- b) You can view the value of variables marked as sensitive within desktop flow logs by using the Microsoft Power Platform admin center.
- c) Sensitive variables are not visible within desktop flow logs in the Power Automate portal.
- d) You can mark any variable as sensitive.
- e) Only variables that are passwords can be marked as sensitive.

**Answer: a, c, d**

**Question: 4**

A company uses Microsoft 365 apps. You are building a flow that is triggered when a new email arrives. If an email message contains a Microsoft Excel workbook attachment the solution must post the Excel data to an external customer relationship management (CRM) system that runs on a user's workstation.

The CRM system is not accessible by using an API. You need to design the solution. Which three actions should you perform?

(Each correct answer presents part of the solution. Choose three.)

- a) Implement the Create file action from the OneDrive connector in a cloud flow.
- b) Create a desktop flow.
- c) Implement the When a new email arrives trigger in a cloud flow.
- d) Implement the Retrieve email messages action from a desktop flow.
- e) Create a desktop flow and define an input variable of type file.

**Answer: a, c, e**

**Question: 5**

You are a Power Automate developer for a company. The company receives many requests for proposal (RFPs) by email. The company wants to automate the extraction of information from the email attachments. RFPs have a semi-structured format with standardized sections and tables containing information that the company needs.

Contract management users need to be able to view and validate the RFP documents and data. You need to quickly deploy a solution to meet these requirements.

Which three actions should you perform?

Each correct answer presents part of the solution.

- a) Create a form processing model in SharePoint Syntex.
- b) Create and publish a document processing model in AI Builder.
- c) Assign the Document Automation Reviewer role to the Contract management users.
- d) Create a Power Automate flow in Microsoft Teams from a template.
- e) Use the document automation toolkit.

**Answer: b, c, e**

**Question: 6**

You are a Power Automate developer working for an organization with development and production environments. You build cloud flows in a solution in development, export the solution, and import it into the production environment as a managed solution. After a flow has failed, you edit the flow in production to look at the flow actions.

You fix the flow actions in development and import the new version of the solution into production. The flow still fails. You need to fix the flow in production. What should you do?

- a) Uninstall the solution.
- b) Add co-owners.
- c) Remove the unmanaged layer.
- d) Show dependencies.
- e) Add required objects.

**Answer: c**

**Question: 7**

You need to identify the actions that PipelineManager1 can perform. Which three actions can PipelineManager1 perform?

Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- a) Set the cloud flow priority.
- b) Modify or delete a flow
- c) Add or remove other owners.
- d) Override the DLP policy.
- e) Modify the owner's connection credentials.
- f) View the run history.

**Answer: a, b, f**

**Question: 8**

You need to address the issue with the capacity planning flow. What should you do?

- a) Increase the CPU and memory of the machine on which the gateway is hosted.
- b) Create a gateway cluster.
- c) Configure the system to send alerts when the gateway fails.
- d) Create a machine group and add machines to the group to handle requests.

**Answer: d**

**Question: 9**

A client would like you to create a custom connector. You need to configure the connector. Which element is required?

- a) On-premises data gateway
- b) Power Automate per user license
- c) JSON sample for request
- d) Power Automate per flow license
- e) API Key

**Answer: e**

**Question: 10**

You are designing a user interface automation that uses a Power Automate for desktop flow. The solution must allow you to use wildcard characters including question marks and asterisks to define a window on a desktop. You need to select the window mode for the automation.

Which window mode should you use?

- a) By title and/or class
- b) By variable
- c) By window instance/handle
- d) By window UI element

**Answer: b**

## **What Study Guide Works Best in acing the Microsoft PL-500 Power Automate RPA Developer Certification?**

The PL-500 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

### **Explore the Syllabus Topics and Learn from the Core:**

If you are determined to earn success in the Power Automate RPA Developer exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

### **Make Your Schedule:**

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

## Get Expert Advice from the Training:

Do not forget to join the Microsoft PL-500 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

## Get Access to the PDF Sample Questions:

If your study material is in a [PDF format](#) or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

## Avoid Dumps and utilize the Microsoft PL-500 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, PL-500 practice tests always stand out to be the better choice than dumps PDF.
