Practice Exam	**Microsoft AZ-204 Certification Practice Exam**

Enhance Knowledge with AZ-204 Sample Questions:

Question: 1

You are developing an internal website for employees to view sensitive data. The website uses Azure Active Directory (AAD) for authentication.
You need to implement multifactor authentication for the website. What should you do?
Each correct answer presents part of the solution. NOTE; Each correct selection is worth one point.

a) In Azure AD, create a new conditional access policy.
b) In Azure AD, enable application proxy.
c) Configure the website to use Azure AD B2C.
d) In Azure AD conditional access, enable the baseline policy.
e) Upgrade to Azure AD Premium.

Answer: a, e

Question: 2

Which of the following would you use to secure the Shipping Logic App?

a) Azure App Service Environment
b) Azure AD B2B integration
c) Integration Service Environment
d) VNet service endpoint

Answer: c

Question: 3

You are implementing an Azure API app that uses built-in authentication and authorization functionality. All app actions must be associated with information about the current user.
You need to retrieve the information about the current user. What are two ways to achieve the goal?
Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

a) HTTP headers
b) environment variables
c) /.auth/me HTTP endpoint
d) /.auth/login endpoint

Answer: a, c

Question: 4

You are developing a mobile instant messaging app for a company. The mobile app must meet the following requirements:
- Support offline data sync.
- Update the latest messages during normal sync cycles.
You need to implement Offline Data Sync. Which two actions should you perform?
Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

   a) Retrieve records from Offline Data Sync on every call to the PullAsync method.
   b) Retrieve records from Offline Data Sync using an Incremental Sync.
   c) Push records to Offline Data Sync using an Incremental Sync.
   d) Return the updatedAt column from the Mobile Service Backend and implement sorting by using the column.
   e) Return the updatedAt column from the Mobile Service Backend and implement sorting by the message id.

Answer: b, d

Question: 5

A company uses Azure SQL Database to store data for an app. The data includes sensitive information in a column named CustDetails. You need to implement measures that allow only members of the managers group to see sensitive information.
Which two actions should you perform?
Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

   a) Include the managers group
   b) Exclude the managers group
   c) Exclude the administrators group.
   d) Navigate to the following URL:

```
PUT https://management.azure.com/subscriptions/00000000-1111-2222-3333-444444444444
/resourceGroups/rg01/providers/Microsoft.Sql/servers/server01/databases/customers
/transparentDataEncryption/current?api-version=2014-04-01
```

   e) Run the following Azure PowerShell command:

```
New-AzureRmSqlDatabaseDataMaskingRule -SchemaName "dbo" -TableName "customers" `
  -ColumnName "CustDetails" -MaskingFunction "Default"
```

Answer: d, e

Question: 6

A team is setting up logging for its Azure web app and wants only warning, error, and critical data. Which of the following levels best meets this requirement?

a) Disabled
b) Warning
c) Detailed
d) Verbose

Answer: b

Question: 7

You are developing a project management service by using ASP.NET. The service hosts conversations, files, to-do lists, and a calendar that users can interact with at any time.
The application uses Azure Search for allowing users to search for keywords in the project data.
You need to implement code that creates the object which is used to create indexes in the Azure Search service.
Which two objects should you use?
Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

a) SearchService
b) SearchIndexClient
c) SearchServiceClient
d) SearchCredentials

Answer: c, d

Question: 8

A developer wants to create an Azure logic app that will run at a scheduled time, but if a recurrence is missed, the trigger needs to go back and process the missed recurrence. Which trigger type would best meet this requirement?

a) Sliding Window trigger
b) Delay trigger
c) Azure Logic Apps does not support this requirement.
d) Recurrence trigger

Answer: a

Question: 9

A company is implementing a publish-subscribe (Pub/Sub) messaging component by using
Azure Service Bus. You are developing the first subscription application.
In the Azure portal you see that messages are being sent to the subscription for each topic. You
create and initialize a subscription client object by supplying the correct details, but the
subscription application is still not consuming the messages.
You need to complete the source code of the subscription client. What should you do?

a) await subscription Client.Add Rule Async(ne.v RuleDescription
(RuleDescription.DefaultRuleName, new TrueFilter()));
b) subscriptionClient.RegisterMessageHandler(ProcessMessagesAsync,
BiessageHandlerOptions);
c) subscriptionClient « new SubscriptionClient(ServiceBusConnectionString, TopicName,
SubscriptionName);
d) await subscriptionClient.CloseAsync();

Answer: d

Question: 10

You are creating a hazard notification system that has a single signaling server which triggers
audio and visual alarms to start and stop. You implement Azure Service Bus to publish alarms.
Each alarm controller uses Azure Service Bus to receive alarm signals as part of a transaction.
Alarm events must be recorded for audit purposes. Each transaction record must include
information about the alarm type that was activated. You need to implement a reply trail auditing
solution.
Which two actions should you perform?

a) Each correct answer presents part of the solution. NOTE: Each correct selection is worth
one point.
b) Assign the value of the hazard message SessionID property to the SequenceNumber
property.
c) Assign the value of the hazard message SequenceNumber property to the
DeliveryCount property.
d) Assign the value of the hazard message MessageId property to the DeliveryCount
property.
e) Assign the value of the hazard message SessionID property to the ReplyToSessionId
property.
f) Assign the value of the hazard message MessageId property to the SequenceNumber
property.
g) Assign the value of the hazard message MessageId property to the CorrelationId
property.

Answer: d, f

What Study Guide Works Best in acing the Microsoft AZ-204 Developing Solutions for Azure Certification?

The AZ-204 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Developing Solutions for Azure exam, getting in full touch of the **syllabus** is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the Microsoft AZ-204 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a **PDF format** or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and utilize the Microsoft AZ-204 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, AZ-204 practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven AZ-204 Practice Test for Success!!!

Do you want to pass the AZ-204 exam on your first attempt? Stop worrying; we, EduSum.com are here to provide you the best experience during your Developing Solutions for Microsoft Azure preparation. Try out our free mock tests to get a glimpse of our quality study materials, and build your confidence with the premium **AZ-204 practice tests**. Our expert-designed questions help you to improve performance and pass the exam on your first attempt.
