Schedule Exam	**SAP Training**
Sample Questions	**SAP Data Engineer Certification Sample Question**
Recommended Practice	**SAP Data Engineer Certification Practice Exam**

Enhance Knowledge with C_HAMOD_2404 Sample Questions:

Question: 1

Which of the following approaches can be used to implement union pruning?

There are 2 correct answers to this question.

- a) Define union pruning conditions in a pruning configuration table.
- b) Define a restricted column and include it in both data sources of a union.
- c) Define a constant value for each data source in the Union node.
- d) Define the cardinality between the data sources.

Answer: a, c

Question: 2

Why would you use SAP HANA Replication Services?

There are 3 correct answers to this question.

a) To replicate data from SAP HANA on-premise to SAP HANA Cloud
b) To replicate data from non-SAP cloud providers to SAP HANA Cloud
c) To replicate users and their privileges from SAP HANA on-premise to SAP HANA Cloud
d) To replicate data from SAP HANA Cloud to SAP HANA on-premise
e) To replicate calculation views from SAP HANA on-premise to SAP HANA Cloud

Answer: a, c, e

Question: 3

Your flowgraph begins with a row generator node. What does the generated column contains?

Please choose the correct answer.

a) A constant value
b) A range of dates
c) A sequential row number
d) The result of an SQL expression

Answer: c

Question: 4

You are building a CUBE calculation view with an aggregation node that calculates total sales, based on the data shown in the graphic. The price may vary based on SHIRT_ID and PROMO_LEVEL only. The calculation is Total Sales = PRICE * QUANTITY.

STATE	SHIRT_ID	PROMO_LEVEL	PRICE	QUANTITY
GA	X123	H	10	10
NY	X123	M	5	10
GA	Y123	H	12	10
NY	Y123	M	6	10
GA	Y123	M	6	10
GA	X123	M	5	10

How do you ensure accurate results, regardless of the columns in the query output?

Please choose the correct answer.

a) Set the Keep Flag property for SHIRT_ID
b) Set the Dynamic Partition property for SHIRT_ID and PROMO_LEVEL.
c) Set the Calculate before Aggregation property.
d) Set the Keep Flag property for SHIRT_ID and PROMO_LEVEL.

Answer: d

Question: 5

You have a CUBE calculation view that consumes a DIMENSION view. You suspect some DIMENSION columns have been renamed in the CUBE calculation view. Which function do you use to check where the output columns originate from?

Please choose the correct answer.

a) Show lineage
b) Where used
c) Impact analysis
d) Label column

Answer: a

Question: 6

An analytic privilege authorizes you to view data for Europe and the USA in the sales calculation view, and another analytic privilege authorizes you to view data for Asia and the USA in the income calculation view. The income view uses the sales view as a data source. Both calculation views check analytic privileges.

What data are you authorized to view when querying the sales calculation view?

Please choose the correct answer.

a) Data from Europe and the USA
b) Data from the USA
c) Data from Asia and the USA
d) Data from Europe, Asia, and the USA

Answer: b

Question: 7

Which tool or technique is most suitable for detecting unauthorized access or anomalies in data model usage?

Please choose the correct answer.

- a) Data loss prevention software
- b) Intrusion detection systems
- c) SQL performance monitoring tools
- d) Database normalization

Answer: b

Question: 8

Why do you set a transparent filter in a calculation view?

Please choose the correct answer.

- a) To remove an unwanted attribute from an aggregation
- b) To include an attribute in an aggregation
- c) To allow a user to remove a predefined filter
- d) To expose the expression used in a filter to a user

Answer: a

Question: 9

What can you do with a projection node in your calculation view?

There are 3 correct answers to this question.

- a) Apply a filter to the data source
- b) Join multiple data sources
- c) Define a restricted column
- d) Implement an input parameter
- e) Define a calculated column

Answer: a, d, e

Question: 10

In securing a data model, which of the following measures should be taken to ensure data confidentiality and integrity?

There are 3 correct answers to this question.

a) Data encryption at rest and in transit
b) Routine security audits of the data models
c) Use of multi-factor authentication for database access
d) Consolidation of all data into one database to reduce points of attack
e) Application of the principle of least privilege to database access controls

Answer: a, b, e

What Study Guide Works Best in Acing the SAP C_HAMOD_2404 Data Engineer Certification?

The C_HAMOD_2404 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Data Engineer exam, getting in full touch of the **syllabus** is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the SAP C_HAMOD_2404 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a **PDF format** or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and Utilize the SAP C_HAMOD_2404 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, C_HAMOD_2404 practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven C_HAMOD_2404 Practice Test for Success!!!

Do you want to pass the C_HAMOD_2404 exam on your first attempt? Stop worrying; we, ERPPrep.com are here to provide you the best experience during your Data Engineer preparation. Try out our free mock tests to get a glimpse of our quality study materials, and build your confidence with the premium **C_HAMOD_2404 practice tests**. Our expert-designed questions help you to improve performance and pass the exam on your first attempt.
